

The UBGR Ultra Series Background Reflector

Background Reflector for White Lightning Ultra Series Flash Units

The **UBGR Ultra Background Reflector** is an excellent tool to help photographers achieve good subject-to-background separation. This reflector is designed to work on a single flash unit, positioned directly behind your subject. By design, the **Ultra Background Reflector** can be used in tight setups, where side lighting or grids don't have enough room. The light pattern of your unit with the UBGR fans out behind your subject. The spread will gradually fall off as it covers the background, accenting the background, and gently providing a halo effect behind your subject. For those photographers who use painted and textured backgrounds, this is a great way to highlight the background, without overpowering your subject.

As shown in the first drawing to the right, the UBGR fits comfortably in place of your standard reflector on any Ultra Series unit. The UBGR comes with two parts: the background reflector, and the light blocker. The reflector is a white shovel reflector, catching the light from your flash unit, and evenly bouncing it onto your background. To position your flash unit vertically, it may be placed on a small stand, like our LS1100 back-light stand, then hidden directly behind your subject. By adjusting the positioning arm on your unit, you can point the flash unit directly up, and towards your background. This will allow the background reflector to catch the light, and throw it evenly on your backdrop.

With the Ultra Series, we include the light blocker, which cuts down on any stray light that may be emitted from the air vents. This reduces the flare that may hit your background, subject, or camera lens. The light blocker piece can be used with other reflectors as well, fitting directly over the vents on your unit.

Figure 1 shows the UBGR on the Ultra Series unit, fitting in place of the standard Ultra Series reflector.

Figure 2 gives a good impression of how the light pattern falls off behind a subject, with specifics on f-stop loss as the light is spread across the backdrop.

White Lightning is a division of Paul C. Buff, Incorporated. If you have any questions or comments, please feel free to call our Toll Free Customer Line at 1-800-443-5542, or e-mail us at sales@white-lightning.com. Our office hours are Monday through Friday, 9:00am until 5:00pm, Central Standard Time. Thank you for ordering the UBGR!
